INDEX

- I. Application Login & Server Connectivity*
- II. Market Watch*
- III. Orders & Trades Management*
- IV. Message Area*
- V. Preferences*
- VI. Features related to Market Statistics*
- VII. Miscellaneous*
- VIII. List of Key Board Short Keys*

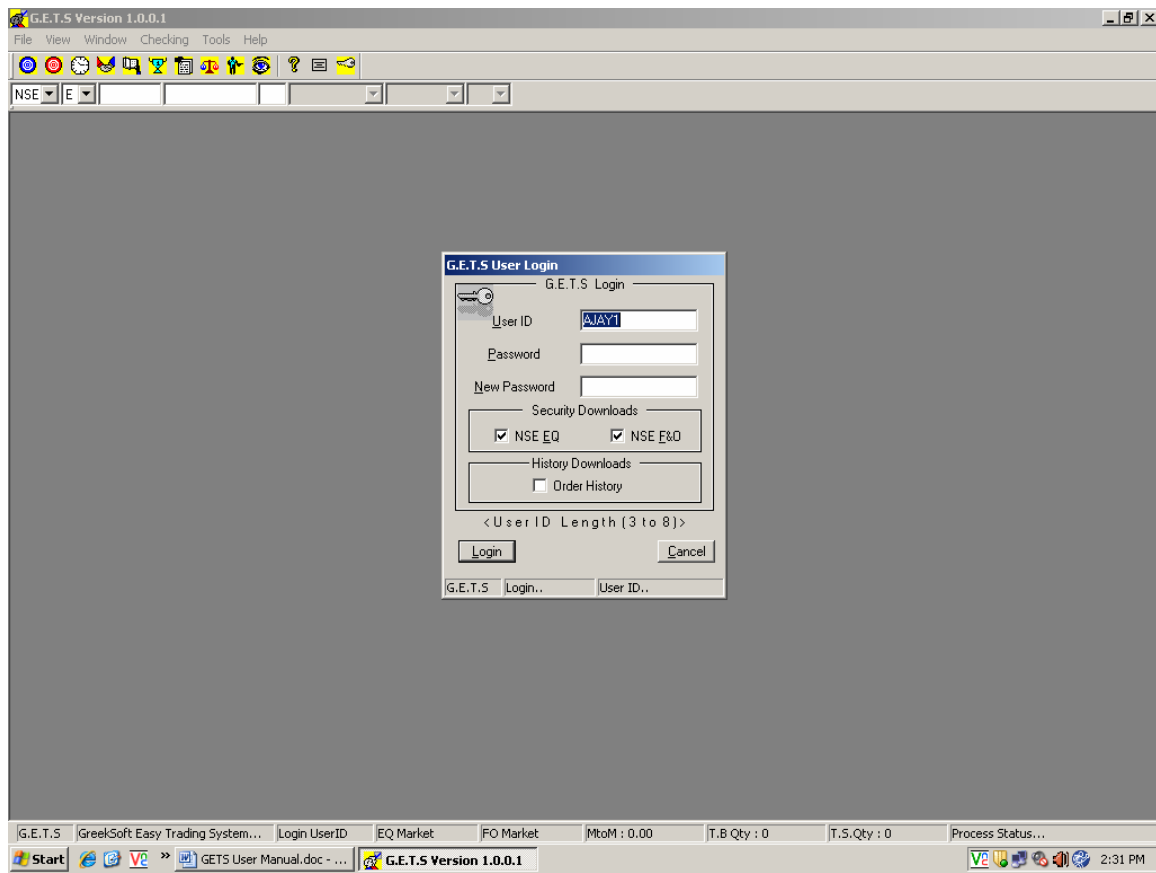

I. Application Login & Server Connectivity:

Once the GETS package is installed, the user needs to double click on CTCLClient icon from desktop, which displays the below login dialog.

When the user login for first time, he needs to check the server connectivity from Tools menu -> Server Settings. In the following screen he needs to input the proper server IP details and login.

The user needs to input the proper User ID & Password to login. He can check the Security Downloads options to download the latest scrip master files from server. He can also check Order history button, if he wants the previous session orders to be loaded.

User ID & Password Policy:

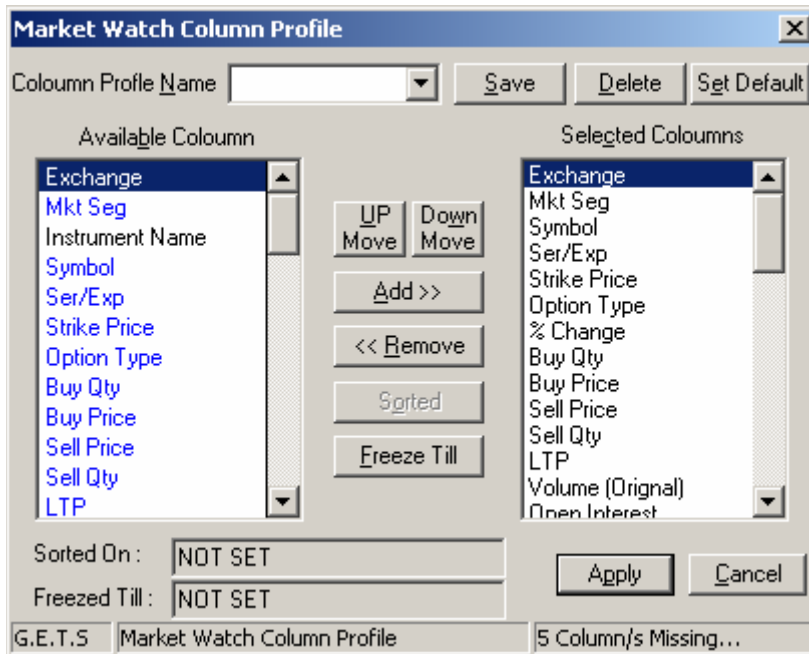

The no. of characters in user id should be from 3 to 8 and password should be from 6 to 8. The password characters must be combination of alpha-numeric. The application prompts the user to change the password for every 15 days. In this case the password change is mandatory.

If the user enters the wrong password for 3 consecutive times, the application login will be blocked. He needs to get the user id unblocked from the administrator.

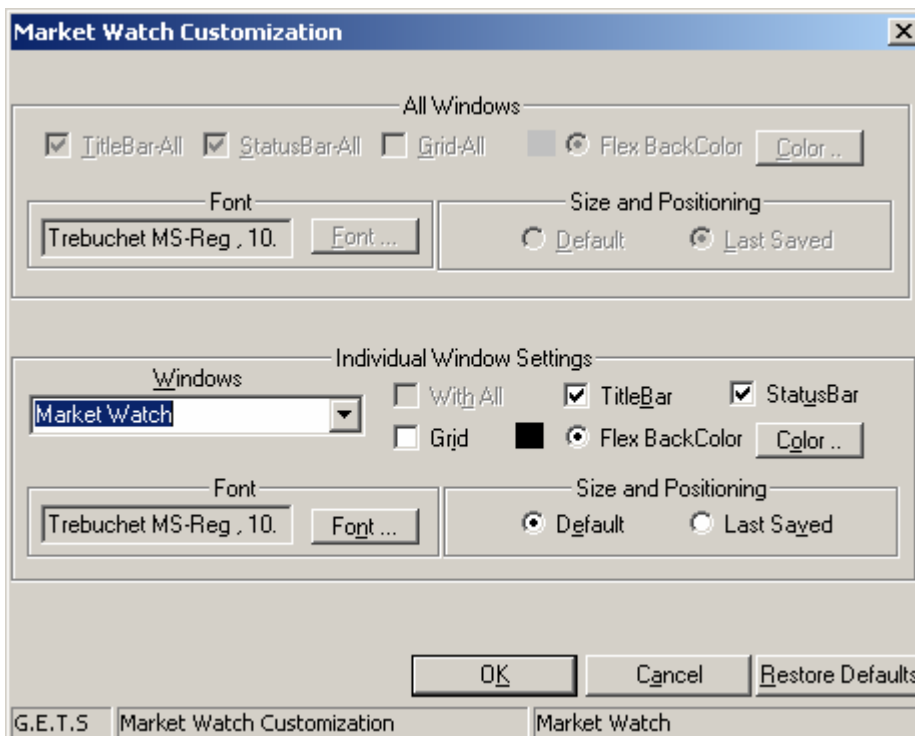

If the user forgot the terminal password, he needs to get the password reset from the administrator after which the user needs to change the password.

If the terminal is kept idle for defined time frame in the application settings, the application will get locked. To unlock, he needs to enter the terminal password.

The user can customize the market watch columns using right click market watch -> Miscellaneous -> Grid settings -> Column profile and save the profile.

The user can customize the color, font and dialog position settings of market watch using right click market watch -> Miscellaneous -> customize.

The foreground, background, grid & market watch row selection colors, Enable-Disable grid and Fit to column size can be set through right click market watch -> Miscellaneous -> grid settings. The status bar and title bar can be enabled or disabled from right click on market watch or using CTRL+U and CTRL+T respectively.

The user can also filter all the instruments present for specific scrip by calling relevant records (CTRL+D). He can also filter relevant scrip information across segments using CTRL+SHIFT+D. He can call the same from right click market watch -> Miscellaneous -> display records.

To enable or disable the scrip bar on the top of market watch call SHIFT+C and for toolbar call SHIFT+R.

Various actions the user can call from market watch are covered in Orders & Trades management section below.

All the GETS work station settings are stored under 'GETS Settings' folder, from the application startup location. Also the Market watch profiles are stored under 'portfolios' folder in 'GETS Settings'.

User can also define the Output file path on right click on any dialog -> Miscellaneous -> save file -> GETS file path.

III. Orders & Trades Management:

Buy Order Entry (F1/+) & Sell Order Entry (F2/-):

The user can select any scrip in market watch and submit order to exchange using Buy / Sell order entry dialog. He needs to input the product type (Margin / Margin Plus), order quantity, order price, disclosed quantity, Pro / Client, Client id (if it is client order) & order validity (DAY / IOC) to submit the order to exchange.

Exchange	Mkt. Seg	Order	Code	Symbol	Series	Prod Type	Auc No	Total Qty	Price	SDays
NSE	E	RL	22	ACC	EQ	Margin	0	0.00	0.00	0
Dis Qty	Pro/Client	Client	Member Id	Trig Price	Validity	Date				
1	CLI	OH01	07782		DAY	8/ 3/2009				

Submit Clear

G.E.T.S Equity Buy Order ACC LIMITED

If the user wishes to select different market segment in order entry dialog he can select through the mkt. seg. List box or he can call CTRL+E for EQ, CTRL+F for futures and CTRL+O for options.

Pending Orders (F3)

All the pending orders that are pending at exchange are displayed in pending order book, from where the user can modify / cancel any order / cancel all pending orders. To modify

a specific order, he needs to select the order, call SHIFT+F2 and enter the quantity, price, order type & validity. To cancel any specified order, select the order and call SHIFT+F1. To cancel all pending orders at once, call SHIFT+F3.

The user can also filter the pending orders across multiple options by calling SHIFT+S. He can also filter on time basis, by selecting time from to time till.

Various order status messages where the filters can be applied are unconfirmed, pending, cancelled & rejected.

If the user calls the F3 once it will display the pending orders for selected scrip in market watch. Calling F3 twice displays all pending orders.

V. Preferences

The GETS application preferences are present under tools menu -> client settings. The GETS settings are categorized into different tabs as mentioned below.

General Tab – Settings for tickers display, login checks, formats, application lock, market watch and Workspace

Order Tab – Order entry related defaults, Message alert checks & color changes in MW

Option Calc Tab – Default settings for option calculator

Server Tab – GETS Server environment settings

Windows Tab – Windows appearance settings

Cost of Carry Tab – Settings for Cost of Carry calculation

Miscellaneous Tab

General Tab

Tickers after Login: User can select the tickers to be ON / OFF post login.

Login Remembrance: To save the login credentials and scrip master download settings for next login

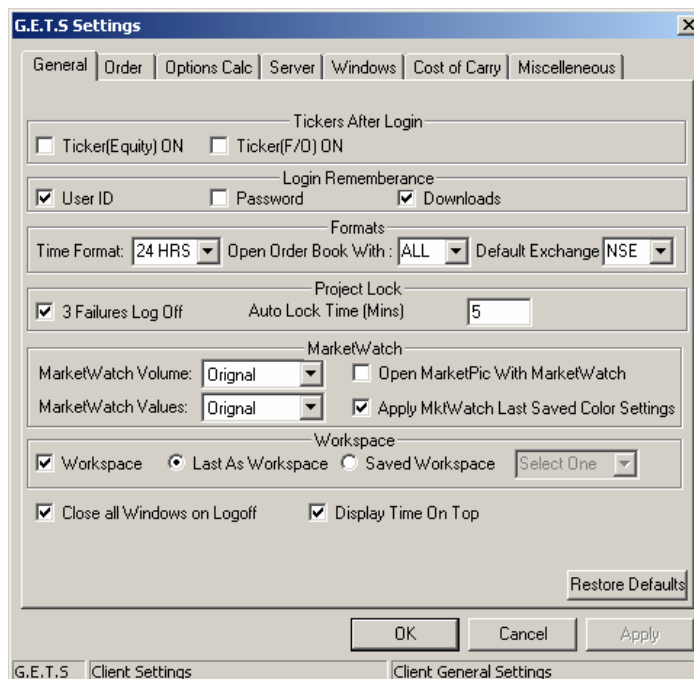

Formats: Display of Time Format (24 HRS/12 HRS) on the tile bar, whether to open the order book (F3) with default order types set ALL/RL/SL, default exchange across dialogs in case of multiple exchanges enabled on terminal.

Project Lock: User can select whether the application gets locked on 3 wrong password entries on application login, default session expiry time after which the application gets auto locked.

Market Watch: User can select 'open market picture with market watch' option to open the market picture automatically when he calls the market watch. He can set the last saved color settings of market watch to save it for the next login session. And he can also set the volumes and other values in multiples of thousands and lakhs.

Workspace: If the user checks the 'workspace' check box, he needs to define the workspace he want to have for the next login. He can select 'Last as Workspace' or his customized 'Saved Workspace'.

The user can also define whether he requires the time to be displayed on title bar and also to close all windows on logoff to keep the work space settings simple for next login.

Order Tab

User can select the default market segment (All / E for EQ / F for FUT / O for OPT) across dialogs. He can define the default disclosed quantity percentage that needs to be calculated in order entry dialog based on the order quantity.

Order quantity settings: If the user wishes the order entry dialog to pick the order quantity present in the touchline info. He can check the 'Market Order Quantity' check box. Else he can uncheck it, which results in picking the lot size as defined for that scrip selected. If he wants the default order quantity to be picked in lots he can define the respective quantity at market segment level in the text box provided. If the Increment/Decrement option is checked, then the tick size in order entry dialog is set as the respective quantity entered in the text box.

The user can define whether he wants the log messages in Message bar for fresh order / modification / cancellation / market order / offline order / Manager Response (server acknowledgement) / price range check. He can also have beep after the order entry. Also he can define the message setting for quantity / price rounding off.

The user can define the default option of PRO/CLI in order entry dialog, default client code and whether to retain the last selected client for the session in order entry.

The user can define the color for up/down broadcast ticks, buy/sell color across dialogs. He can set the single order quantity, value and 'price to LTP %' checks at his terminal.

The screenshot shows the 'G.E.T.S Settings' dialog box with the 'Order' tab selected. The dialog has several sections for configuring order-related settings:

- Window Defaults:** Includes a dropdown for 'Default Market Type' (set to 'ALL'), a dropdown for 'Min DisQty %' (set to '10'), and a checkbox for 'Market Order Quantity'.
- Quantity - Min. Order Lots + Increment/Decrement As Per Min Order Lots:** This section contains three groups of input fields and checkboxes. The first group is for 'E' (EQ) with a value of '1' and a checked 'Increment/Decrement' box. The second group is for 'F' (FUT) with a value of '1' and an unchecked 'Increment/Decrement' box. The third group is for 'O' (OPT) with a value of '1' and an unchecked 'Increment/Decrement' box.
- Message Alert Check:** A grid of checkboxes for various messages: 'Buy/Sell Order', 'Order Modification', 'Market Order', 'Order Cancellation', 'Manager Response', 'Price Range', 'Offline Order', and 'Play Sound'. All are checked except 'Play Sound'.
- Round Off Messages:** A grid of checkboxes for rounding off: '1. Total Qty', '2. Disclose Qty', '3. Price', and '4. Trigger Price'. All are checked.
- PRO/CLI:** Includes a dropdown for 'PRO/CLI (Default)' (set to 'CLI'), a text field for 'Client ID' (set to '0H01'), and a checked checkbox for 'Retain Last Client ID'.
- Color Change:** Includes color selection buttons for 'UP Color', 'DOWN Color', 'Level Color', 'Buy Color', and 'Sell Color'. A 'Change ..' button is also present.
- Single Order Surveillance & Maximum Order Values:** Includes a checked checkbox for 'Check', a text field for 'Quantity' (set to '1000'), a text field for 'LTP % Change' (set to '2.00'), and a text field for 'Value' (set to '0.00').

At the bottom of the dialog are 'OK', 'Cancel', and 'Apply' buttons, and a 'Restore Defaults' button. The status bar at the very bottom shows 'G.E.T.S Client Settings' and 'Client Order Settings'.

Option Calc Tab

The settings under options calc tab are applicable for option calculator usage. The user can set the default underlying asset as stock / future price for option stocks and index / future price for index options. The interest rate also can be defined, which will be considered at arriving the theoretical option price.

The user can select the miscellaneous settings as per his requirement. These include:

- consider calculation of option greeks upon absolute quantity / lot size
- option to exclude / include the expiry day while arriving at option price
- last implied volatility calculation based on cash underlying / option premium
- consider the implied volatility left days as 0.25 / 0.50
- expiry selection for implied volatility calculation

The screenshot shows the 'G.E.T.S. Settings' dialog box with the 'Options Calc' tab selected. The dialog has several tabs: General, Order, Options Calc, Server, Windows, Cost of Carry, and Miscellaneous. The 'Options Calc' tab contains three sections: 1. OPTSTK, 2. OPTIDX, and 3. OPTINT. Section 1 has radio buttons for 'Stock Price' (selected) and 'Future Price', and a text box for 'Interest (%)' set to 10.00. Section 2 has radio buttons for 'Index Price' and 'Future Price' (selected), and a text box for 'Interest (%)' set to 0.00. Section 3 has a checked checkbox for 'Future Price' and a text box for 'Interest (%)' set to 0.00. Below these is a 'Miscellaneous' section with various options: 'View Delta/Gamma/Vega..' (checked), 'Expiry Difference:' (radio buttons for 'Include Expiry' and 'Exclude Expiry'), 'Last IV wrt...' (radio buttons for 'EgFutPrice' and 'Option Price'), 'IV Left Days:' (radio buttons for '0.25' and '0.50'), 'IV Exp Date:' (a date picker set to 27AUG2009), and 'Average IV' (unchecked checkbox). At the bottom right of the miscellaneous section is a 'Restore Defaults' button. At the bottom of the dialog are 'OK', 'Cancel', and 'Apply' buttons. The status bar at the very bottom shows 'G.E.T.S. Client Settings' and 'Client Options Calculator Settings'.

Section	Option	Value
1. OPTSTK	Stock Price	Selected
	Future Price	Unselected
2. OPTIDX	Index Price	Unselected
	Future Price	Selected
3. OPTINT	Future Price	Checked
	Interest (%)	0.00
Miscellaneous	View Delta/Gamma/Vega..	Checked
	Expiry Difference:	Include Expiry
	Last IV wrt...	Option Price
	IV Left Days:	0.50
	IV Exp Date:	27AUG2009
	Average IV	Unchecked

Server Tab

Server tab contains the environment settings where the GETS client is connected. User can verify the server IP, broadcast and interactive IP & port details.

The screenshot shows the 'G.E.T.S. Settings' dialog box with the 'Server' tab selected. The dialog has a title bar with a close button. Below the title bar are tabs: 'General', 'Order', 'Options Calc', 'Server' (selected), 'Windows', 'Cost of Carry', and 'Miscellaneous'. The 'Server' tab contains the following settings:

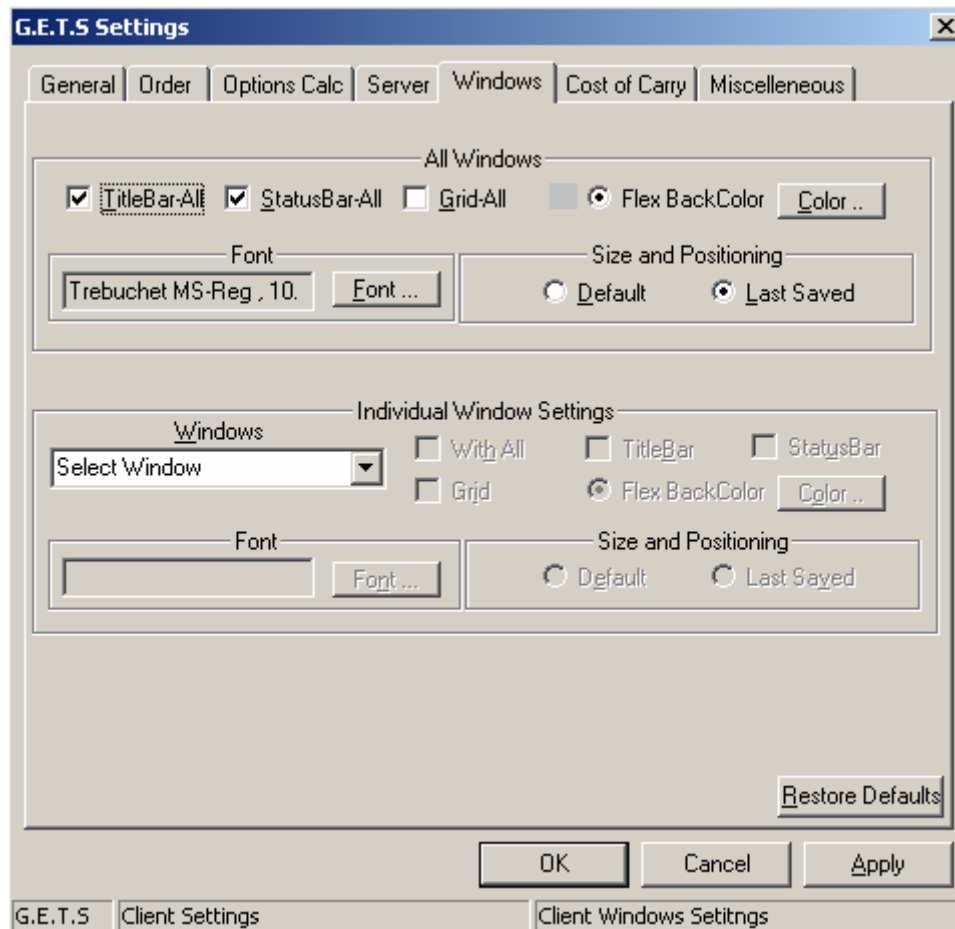

- Local IP Add:** 192 . 168 . 0 . 18
- Server IP Add:** 192 . 168 . 0 . 15
- UDP Settings:**
 - ☒ Subscribed ☐ All Apply & Change
 - No. of UDP Ports:** 2
 - UDP Port 1:** 4560 **IP Address 1:** 232 . 1 . 2 . 3
 - UDP Port 2:** 5678 **IP Address 2:** 232 . 1 . 2 . 3
 - UDP Port 3:** 0 **IP Address 3:** . . .
 - UDP Port 4:** 0 **IP Address 4:** . . .
- Subscribed Broadcast:**
 - No. of UDP Ports:** 2
 - UDP Port:** 4561 **IP Address:** 232 . 1 . 2 . 3
 - UDP Port:** 5671 **IP Address:** 232 . 1 . 2 . 3
- TCP Settings:**
 - No. of TCP Ports:** 1
 - All TCP Port:** 50000
 - Port 1:** 0 **Port 2:** 0 **Port 3:** 0

At the bottom right of the dialog is a 'Restore Defaults' button. At the very bottom are 'OK', 'Cancel', and 'Apply' buttons. The status bar at the bottom shows 'G.E.T.S.' on the left, 'Client Settings' in the middle, and 'Client Server Setitngs' on the right.

Windows Tab

Under Windows tab, the user can set the window appearance settings for all windows at once / individual window level settings.

The user can select whether he requires the title bar, status bar & grid should be enabled or disabled. He can set the background color, font settings and size & positioning of the window.

Cost of Carry Tab

When the user does the arbitrage in cash and futures market, he needs to consider the cost of carrying the cash position. Cost of carry tab covers the settings for the same.

User can select whether the gross calculation is in beeps terms / considering remain days to expiry of the futures position. He needs to input the long / short contract cost considerations for cash and futures.

The screenshot shows the 'G.E.T.S. Settings' dialog box with the 'Cost of Carry' tab selected. The dialog has a title bar with a close button. Below the title bar are tabs: 'General', 'Order', 'Options Calc', 'Server', 'Windows', 'Cost of Carry', and 'Miscellaneous'. The 'Cost of Carry' tab is active, showing a 'COC Setting' section with two radio buttons: 'Gross Calc on BPS' (unselected) and 'Gross Calc with Remain Days' (selected). Below these are two groups of input fields: 'Equity' and 'Future'. Each group has 'Long' and 'Short' positions, each with a 'Per' value. All input fields contain the value '12500' for the position and '10000000' for the 'Per' value. Below these groups is a 'File Create Time' field with the value '1' and a 'Create File' checkbox. At the bottom of the 'COC Setting' section is an 'Avg. Price Start Time Settings' section with 'Hour' and 'Minute' fields, both containing '0'. A 'Restore Defaults' button is located at the bottom right of the dialog. At the very bottom are 'OK', 'Cancel', and 'Apply' buttons. The status bar at the bottom shows 'G.E.T.S.', 'Client Settings', and 'Client Cost of Carry Setitngs'.

COC Setting

Miscellaneous Tab

Contrary messages settings: These settings need to be checked in case the user needs a message when there is any operational difference of pre-defined settings of PRO/CLI and default client code selection in order entry.

Give feasible position to window will auto save the dialog position set by the user.

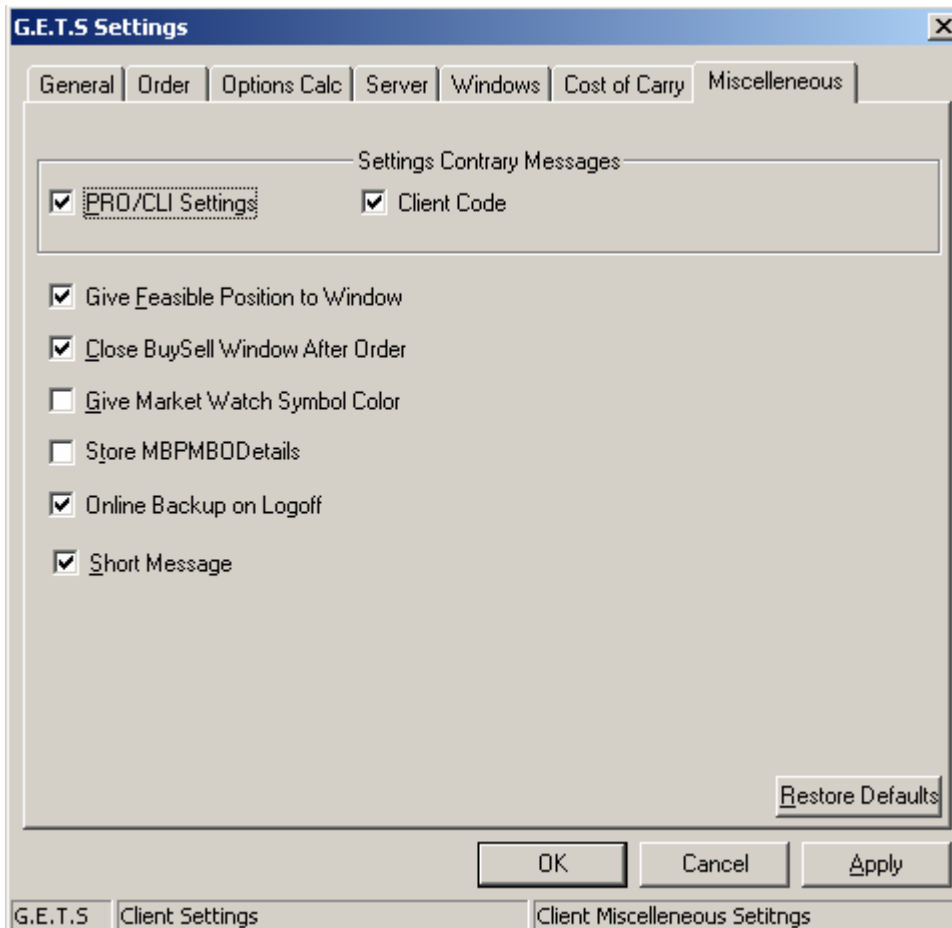

Close BuySell window after order option closes the order entry dialog after order submission.

Give Market watch symbol color option marks the trading symbol with market trend color.

Store MBPMBODetails option stores the market picture information for Market Movement (SHIFT+F9) data.

Online backup on logoff option will generate the trade backup while application logoff.

Short Message option makes the orders & trades log messages in short form in Message Log.

VI. Features related to market statistics

Most Active Securities with filter (ALT+SHIFT+F10)

Most active securities dialog displays the most active securities traded by value and by volume during the trading day. If the user wishes to filter, he can call top gainers and losers with filters (SHIFT+F10) and filter at exchange, market segment, LTP range and no. of records.

Theoretical IV settings for options

GETS application has the theoretical option IV setting through which the user can input the theoretical implied volatilities for individual scrip. In market watch there is a field, theoreticalprice, which calculates the actual price of option based on this theoretical IV stored. The deviation of theoretical price from the actual is shown under 'Diff(LTP-theoreticalprice)' in market watch.
