G.E.T.S. User Management <No Scrip>

Group Id: HO

User Status: Normal User / Admin

Category: Dealer / Retail / Group Admin / Mini Admin

Dealer – CTCL login ID for trading

Retail – Client Account ID

Group Admin – CTCL login ID for monitoring

Mini Admin – Mapped CTCL login ID for monitoring (Positions and trades)
 User / Client ID: Mention the User / Client ID (Minimum 3 characters)
 Client Name: Name of the User / Client Account
 Password: (Default password is the user name itself)
 Broker ID: Trading Member ID
 Branch Name: Branch Name
 Pin Code: Pin Code as per the ENIT terminal information (Only for Dealer / Group Admin Category)
 PAN No.: For Retail category
 Participant ID: For Institutional Client Accounts (Only for Retail Category)
 Active / Suspended: To update the status of the ID; select active
 Mapped To: USER mapped to Admin or Mini admin for Monitoring.
 Activation/ Deactivation: To active or suspend ID.
 Upload Retailers: To upload Bulk retailers.

Updating CTCL terminal details:

Markets Allowed: Tick the market segment allowed for the user (Only for Dealer / Group Admin Category)

NSE EQ / NSE FO / BSE EQ / MCX FO / NCDEX FO / NSE CD / MCX-SX / USE / Manual Not Allowed.

Automated – Tick if automated trading needs to be enabled

Manual Not Allowed – Tick if manual trading not allow needs to be enabled

TWS ID: TWS ID of market segment

Branch ID: Branch ID of market segment

Member ID: Trading Member ID of respective market segment

User ID: CTCL ID of respective market segment that is configured on Manager
 City, Address, Telephone, Fax, Mobile, E-Mail ID

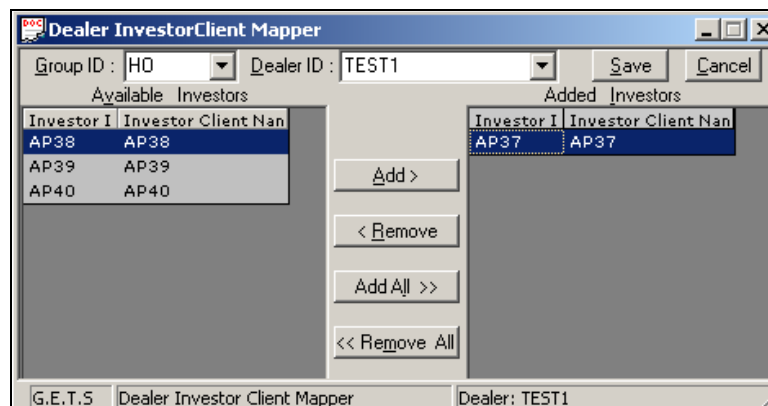

Unlock GETS Client / Reset Password:

On entering 3 times wrong password, GETS client will be locked. In this case, client needs to be unlocked from ADMIN terminal from User -> Set Client Password dialog. To unlock, admin needs to enter the respective User ID and modify. To reset password, admin has to select the user id, enter the new password and modify.

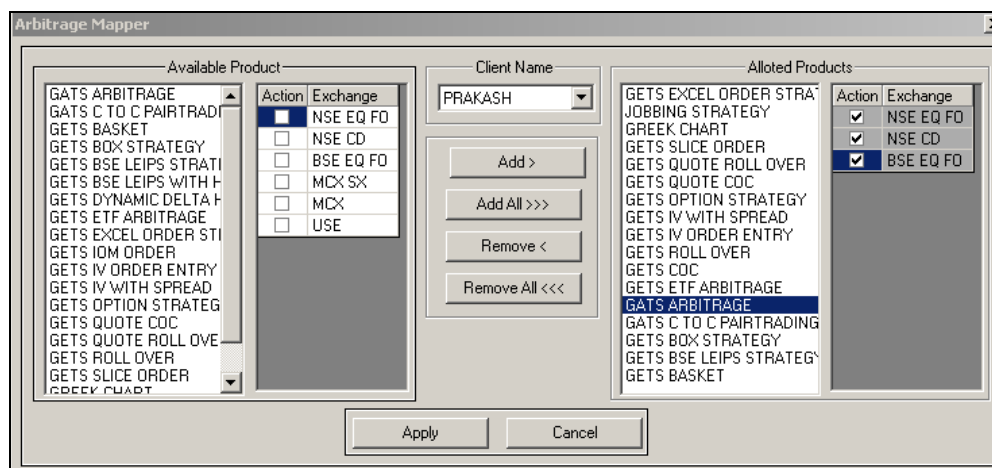

Dealer Client Mapper

Admin can map the clients to dealers from this dialog.

Arbitrage Mapper

Admin map arbitrage product with respective exchange.

Max Number of Order Lots per rule - 3 lots max

Max Number of Total Lots per rule (Overall limit) – 10 lots max

Max Threshold Qty Allowed in % (Max the Qty available in depth) –100 max

Market Protection Limit in (%) – 10/% (maximum 10% loss side rules will be add)

Order Opportunity (%) – 10 (if the ongoing spread difference calculated with respect to LTP changes above or below the specified percentage; the Algo Application will stop/restrict order generation for that particular Algo Spread rule and message for the same will reflected on Client terminal)

If the admin wishes to modify, he can select the respective arbitrage setting from grid, update the data and modify the settings. Any particular setting can also be deleted, upon which the respective user cannot able to add any new rule in the arbitrage type.

Upon execution of trades, the total quantity will get reduced by the traded quantity.

Admin can click on the Setting button and save the selected values as default values.

Allowed Scrip Management

Admin has to allow scrip to all users.

Admin can set selected scrip with strategy wise.

- Cash to future: Exchange – NSE, Segment-Equity, Series/Instrument-EQ, Symbol-All, and Expiry – 26SEP2013.
- Options: Exchange – NSE, Segment- Derivative, Series/Instrument-OPTIDX, Symbol-NIFTY, Expiry – User define, Option-CE/PE, Strike1- From, Strike2-To.

Admin can restrict scrip through Banned Scrip.

Admin can Export or Import surveillance in Excel.

RMS Master:

Admin set surveillance for Group Admin, Mini Admin, Dealer, Retailer with Exchange and Market segment.

All Exchange & All Segment: Aggregate surveillance of All exchange and segment.
Category: Set category wise surveillance.

User ID: Select User Id for surveillance set.

Exchange: Set surveillance as per Exchange.

Market Segment: Set surveillance as per EQ, Future & Option.

Scrip: To set Surveillance for a Particular Scrip.

Save File / Load File: To Import or export surveillance.

The screenshot shows the 'Surveillance Master' application window. At the top, there are dropdown menus for Category (Group Admin), User ID (ADMIN), Exchange (ALL), Mkt Seg (ALL), and Scrip (EMPTY). Below these are buttons for Default Setting, Add, Modify, Delete, Save File, Load File, and Cancel. The main area is divided into several sections:

- Funds Available:** Includes checkboxes for Deposit Amount, Intraday Deposit, Collateral Amount, Reliazed MtoM, and Unreliazed MtoM.
- Single Order Validations:** Includes input fields for Single Order Lot Size (99999), Single Order Value (5000.00 Lac), and Price % Change (999.000 %).
- Quantity Validation:** Includes input fields for Buy Qty (99999999), Sell Qty (9999999), and Net Qty (999999).
- Pending Order Validation:** Includes input fields for Total Order Qty (999999), Buy Order Qty (999999), Sell Order Qty (99999999), and their corresponding values in Lac.
- Scripwise Turnover Settings:** A table with columns for UserID, Exchange, Scrip, Buy Value (In Lac), and Sell Value.
- Basic Limits:** Includes input fields for Value/Exposure Limit Based on, Buy Limit (99999999.000 Lac), Sell Limit (999999.000 Lac), Gross Exposure (9999999.000 Lac), Turnover Limit (9999999.000 Lac), and MTM Limit (9999999.00).
- Margins:** Includes checkboxes for Initial/SPAN Margin, Exposure Margin, Spread Benefits, Add Margin Benefit, and Custom Margin Specification.
- Cash Margins:** Includes checkboxes for VaR Margin and Extreme Loss Margin (ELM).
- Order Restriction settings:** Includes checkboxes for Check Position limits (F&O), Board Lot Quantity, Allow Market Order, Restrict Fresh Sell order, Restrict Fresh Buy order, and Check for DPR / Circuit Filter.
- Price Protection:** Includes input fields for STOCK (30 %), INDEX (10 %), OPTION (120 %), and INTERVAL (120 Sec).
- Market Price %:** A table showing percentages for different market price ranges: 0 to 5 (5.00 %), Above 5 to 50 (4.00 %), Above 50 to 100 (3.00 %), and Above 100 (1.00 %).

1. Single Order Validation:

- Single order Lot size: Maximum single order lot size
(For Eq 1 lot = 1 quantity & for Future 1 lot = Default quantity)
(Lot wise work if flag enabled in CTCLManager.ini in manager folder
'**RMSUseLotWiseValidation=True**'))
- Single order value: Maximum Single order value
(For Option Buy & Sell, order value will be Premium * Quantity.)
- Price % change: Maximum LTP percentage check while order submission.
(Loss Side)

2. Quantity Validation:

- Buy Qty - Maximum Overall Buy Quantity
 - Sell Qty - Maximum Overall Sell Quantity
 - Net Qty - Maximum Overall Net Quantity
- (All validation will check with aggregate of Traded and pending qty)

3. Value Exposure Limit Based On:

- Buy Limit - Maximum Overall Buy Value (in Lacs)
(For Option = Premium * Quantity)
 - Sell Limit – Maximum Overall Sell Value
(For Option = (Strike Price + Premium) * Quantity)
 - Gross Exposure Limit – For below conditions it will be summated,
For different symbol (Net Qty) - (ICICIBank EQ Buy + Suzlon EQ Sell)
At Nil position (Sell-buy) value
(Sell value 2000 & Buy value 1500=500(utilized amount))
 - Turnover Limit – Maximum turnover value
(Buy value + Sell Value)
- (All validation will check with aggregate of Traded and pending value)

4. Pending Order validation:

Total Order Qty – Total maximum Order quantity in pending order.
(Buy Quantity + Sell Quantity)
Buy Order Qty – Maximum Buy Order quantity in pending order
Sell Order Qty – Maximum Sell Order quantity in pending order
Total Order Value – Total Maximum Order value in Pending order.
(Buy Value + sell Value)
Buy Order Value – Maximum Buy Order quantity in pending order

5. Price Protection :

This surveillance is restrict wrong trade in volatile market at minimum time.

Interval = Time interval in second for LTP

STOCK = Equity / Stock (Future stock) / Commodity %

INDEX = Index symbol (Nifty,Banknifty) %

OPTION = Option symbol. %

Example :

If the LTP for INDEX (10% surveillance for Index)

9:15:00 Nifty 4800 and Interval time is 120 seconds, price range will be (4320 to 5280 for Next 120 seconds). Algo order gets stopped if LTP get change below or above the range.

After 120 Seconds new LTP will get consider till next Interval.

9.17.00 New LTP price range get consider till Next Interval.
Same Surveillance checks for EQ/STK/COM & OPTION which % mention in the Price Protection.

6. Market Price % :

(Market Price for Algorithms order will be generate for loss side)
From more protection algo market order won't generate on (0.00) price it will Generate on LTP %.
Ex. LTP is 5000 then order will generate for BUY ($5000 + 3\% = 5150$)
LTP is 5000 then order will generate for SELL ($5000 - 3\% = 4850$)

Admin can set Market price % as per Price range.

7. Margins :

Admin could set Span margin/Initial and Exposure Margin against deposit amount.

Add Margin Benefit – Negative Span Margin will consider as zero.

(Note: Span margin & Exposure Margin file have to mention in Contract & Security Folder)

(Note: Price protection, Market Price%, Margins, Scrip surveillance will be check only for ADMIN user)

8. Scrip Surveillance

Admin can set surveillance on per Script basis. Script check enables across all segments of selected Exchange. Script surveillance only uses for Turnover limit.

<USER> - User ID or ALL

III. Trade and Position Monitoring

Admin can monitor the online intraday position taken by the users / clients. All the trades that happen at the GETS client level will also get updated at the ADMIN level.

Admin can also apply filters and monitor the positions at market segment / symbol / user / client level. Admin can also view the live MToM across users / clients or at particular user / client.

Admin is not allowed to place any orders from his terminal. But he can cancel the pending orders of other users from pending order book.

IV. Tools:

Expense Setting

Admin can define the expense settings, which helps him to track the expenses on each trade received across users / at particular user. The expense calculated will be shown under expense column in net position dialog.

Various parameters those need to be filled in expense settings are explained below.

Exchange Type – Exchange Selection

Market Segment – EQUITY / FUTURE / OPTION

Expense Type – Brokerage/Service Tax/Transaction Charges/STT/Stamp Duty/SEBI Tax

Trade Type – Turnover / Square-off / Non Square-off

Expense on – Buy / Sell / Both

Charges Type – Changes on selection of Market Segment and Trade Type

Expense Rate – Input the expense rate for the selected rule

Base Rate – Base rate on which expense rate is calculated
