1	ALL	Client Information	Login Client	1. GOTO Client folder and Click on CTCI Client.exe 2. on Tools->Server settings->Server window put the Manager IP Address on Server IP. Click on OK 3. on Login Window Put the USER ID= DealerID e.g. 1032151 4. Put the Correct Password in Password field. 5. select the All Exchanges to check on it 6. click on Login button	1. DealerID e.g. 1032151 User is successfully login to Manager which is mention server IP Address. 2. On DealerID e.g. 1032151 status bar Downloading completed message should be display				
2	ALL	Client Information	Login ADMIN	1. GOTO Client folder and Click on CTCI Client.exe 2. on Tools->Server settings->Server window put the Manager IP Address on Server IP. Click on OK 3. on Login Window Put the USER ID=Admin 4. Put the Correct Password in Password field. 5. select the All Exchanges to check on it 6. click on Login button	1. ADMIN User is successfully login to Manager which is mention server IP Address. 2. On ADMIN status bar Downloading completed message should be display				
3	ALL	Client Information	User->Connection information window	1. On ADMIN.GOTO->User->Connection information window is open	1. Connection information window should be open 2. It is displays Status of the connected/disconnected user's including ADMIN user.				
4	ALL	Client Information	User->Connection information window	1. On ADMIN.GOTO->User->Connection information window is open 2. Connection information window is open 3. on Category->Select Dealer 4. on Category->Select Admin Group 5. on Category->Select Mini Admin 6. on User->Select Dealer ID 7. on Status->Select Connected 8. on Status->Select Disconnected 9. on Status->Select Login History	1. Connection information window should be open 2. It should be displays Status of the connected/disconnected user's including ADMIN user. 3. selected Category filter should be display on window 4. selected Admin Group filter should be display on window 5. selected Mini Admin filter should be display on window 6. selected User->DealerID filter should be display on window 7. selected Status->Connected filter should be display on window 8. selected Status->Disconnected filter should be display on window 9. selected Status->Login History filter should be display on window				
5	ALL	Client Information	User->Connection information window->Category	1. On ADMIN.GOTO->User->Connection information window is open 2. Connection information window is open 3. on Category->Select ALL	1. Connection information window should be open 2. It should be displays Status of the connected/disconnected user's including ADMIN user. 3. selected Category ALL filter should be display on window 4. All as per User & Status filter ALL information is display.				
6	ALL	Client Information	User->Connection information window->Category	1. On ADMIN.GOTO->User->Connection information window is open 2. Connection information window is open 3. on Category->Select Dealer	1. Connection information window should be open 2. It should be displays Status of the connected/disconnected user's including ADMIN user. 3. selected Category Dealer filter should be display on window 4. All as per User & Status filter DealerID information is display				
7	ALL	Client Information	User->Connection information window->Category	1. On ADMIN.GOTO->User->Connection information window is open 2. Connection information window is open 3. on Category->Select Admin Group	1. Connection information window should be open 2. It should be displays Status of the connected/disconnected user's including ADMIN user. 3. selected Category Admin Group filter should be display on window 4. All as per User & Status filter Admin Group information should be display				
8	ALL	Client Information	User->Connection information window->Category	1. On ADMIN.GOTO->User->Connection information window is open 2. Connection information window is open 3. on Category->Select Mini Admin	1. Connection information window should be open 2. It should be displays Status of the connected/disconnected user's including ADMIN user. 3. selected Category Mini Admin filter should be display on window 4. All as per User & Status filter Mini Admin information should be display				
9	ALL	Client Information	User->Connection information window->User	1. On ADMIN.GOTO->User->Connection information window is open 2. Connection information window is open 3. on User->Select ALL	1. Connection information window should be open 2. It should be displays Status of the connected/disconnected user's including ADMIN user. 3. selected User ALL filter should be display on window 4. All as per Category & Status filter ALL information should be display				
10	ALL	Client Information	User->Connection information window->User	1. On ADMIN.GOTO->User->Connection information window is open 2. Connection information window is open 3. on User->Select DealerID(particularID)	1. Connection information window should be open 2. It should be displays Status of the connected/disconnected user's including ADMIN user. 3. selected User DealerID filter should be display on window 4. All as per Category & Status filter information should be display				
11	ALL	Client Information	User->Connection information window->Status	1. On ADMIN.GOTO->User->Connection information window is open 2. Connection information window is open 3. on Status->Select Connected	1. Connection information window should be open 2. It should be displays Status of the connected/disconnected user's including ADMIN user. 3. selected Status-Connected filter should be display on window 4. All as per Category & User filter information should be display				
12	ALL	Client Information	User->Connection information window->Status	1. On ADMIN.GOTO->User->Connection information window is open 2. Connection information window is open 3. on Status->Select Disconnected	1. Connection information window should be open 2. It should be displays Status of the connected/disconnected user's including ADMIN user. 3. selected Status-Disconnected filter should be display on window 4. All as per Category & User filter information should be display				
13	ALL	Client Information	User->Connection information window->Status	1. On ADMIN.GOTO->User->Connection information window is open 2. Connection information window is open 3. on Status->Select Login History	1. Connection information window should be open 2. It should be displays Status of the connected/disconnected user's including ADMIN user. 3. selected Status-Login History filter should be display on window 4. All as per Category & User filter information should be display				
14	ALL	Client Information	User->Connection information window	1. On ADMIN.GOTO->User->Connection information window is open 2. Connection information window is open 3. on Category->Select ALL 4. on User->Select All 5. on Status->Select Connected 6. Select any Dealer ID which have to Disconnect from Manager 7. Click on Disconnect.	1. Connection information window should be open 2. It should be displays Status of the connected/disconnected user's including ADMIN user. 3. selected Status-Connected filter should be display on window 4. All as per Category & User filter information should be display 5. Selected Dealer ID should be disconnected from Manager 6. On Admin following Message should be display "User Disconnected" 7. on Client following message should be display "Server Disconnected". Click OK to G.E.T.S. Logout - AND Admin has Disconnected the Service Click OK to Logout!"				
15	ALL	Client Information	Manager->Tools->Client Information	1. GOTO->Manager.exe 2. GOTO->Tools->Client Information 3. Client information window is open	1. Client information window should be open 2. Disconnected user should not display in this window.				
16	ALL	Client Information	CTCI Client Communicator.exe	1. GOTO->Manager.exe 2. View CTCI Client Communicator.exe	1. Admin->Disconnected DealerID should be removed from Communicator.				
17	ALL	Client Information	Login Client	1. GOTO Client folder and Click on CTCI Client.exe 2. on Tools->Server settings->Server window put the Manager IP Address on Server IP. Click on OK 3. on Login Window Put the USER ID= DealerID e.g. 1032151 4. Put the Correct Password in Password field. 5. select the All Exchanges to check on it 6. click on Login button	1.
